Holt McDougal Biology Chapter 10: Principles of Evolution ...

Evolution is the process of biological change by which descendants come to differ from their ancestors. This concept had been discussed for more than 100 years when Darwin proposed his theory of the way evolution works. Today, evolution is a central theme in all fields of biology. The 1700s were a time of great advances in intellectual thought.

CorrectionKey=A DO NOT EDIT--Changes must be made through ...

Following are definitions of common terms referring to the Theory of Evolution that everyone should know and understand, though this is by no means a comprehensive list. Many of the terms are often misunderstood, which can lead to an inaccurate understanding of evolution. The links lead to more information on the topic:

Glossary of Terms Regarding Evolution

The process by which individuals that are better adapted to their environment survive and reproduce more successfully than less well adapted individuals do; a theory to explain the mechanism of evolution. Adapted from Holt Biology 2008
