o Before we start comparing experimental and theoretical probability, students will do a worksheet using a think-pair-share strategy. This will serve as guided practice. Also, the teacher will be guiding and modeling how to compare experimental and theoretical probability using the SmartBoard.

Lesson Topic: Theoretical & Experimental Probability Grade ...

The theoretical probability is 8.3% and the experimental probability is 4%. Although the experimental probability is slightly lower, this is not a significant difference. In most experiments, the theoretical probability and experimental probability will not be equal; however, they should be relatively close.
