Definition: A service blueprint is a diagram that visualizes the relationships between different service components — people, props (physical or digital evidence), and processes — that are directly tied to touchpoints in a specific customer journey. Think of service blueprints as a part two to customer journey maps.

Service Blueprints: Definition

Blueprinting is one tool that can help to make the intangible tangible. Services are processes that are dynamic and time-dependent (Bitner, Ostrom, & Morgan, 2008). As a result, it is important to understand what makes a service possible and to better understand the beginning and end points of a service (Shostack, 1982).
