Mammal classification has been through several revisions since Carl Linnaeus initially defined the class, and at present, no classification system is universally accepted. McKenna & Bell (1997) and Wilson & Reader (2005) provide useful recent compendiums. Simpson (1945) provides systematics of mammal origins and relationships that had been taught universally until the end of the 20th century.

Like all the other parts of your body, your brain needs energy to operate. Simon Laughlin, professor in the department of zoology at Cambridge University, explains why the brain needs so much energy, how it uses energy, and how those needs have affected our evolution.. How much energy does the brain require? For the average adult in a resting state, the brain consumes about 20 percent of the ...
